Create an inventory	
An inventory contains properties, rooms, assets, photos and a set of people that can see these.	
If you are trying to separate assets by location, it is a mistake to create multiple inventories for this purpose; rather, use a single inventory and create properties and rooms inside it.

4. That's it. Your client's inventory account has been created. Note that you are associated as the inventory sponsor. Now you can add other People (see People heading). Invite the client as an administrator, lister, valuator, orbserver, etc. As Administrator they will be able to invite who they want.
